

Section 1 – Final

Create a one-page, professional, web developer–focused resume suitable for entry-level or junior front-end / web developer job applications. The resume should look clean, modern, and ATS-friendly. Use clear section headings, bullet points, and professional wording. Emphasize web development skills, technologies, and projects, since I am an entry-level candidate.

Use the information below and organize it into appropriate resume sections (such as Summary, Education, Web Development Projects, Technical Skills, and Contact Information). You may improve wording, add professional descriptions for projects, and format the content to make me look like a strong junior web developer candidate.

Personal Information

Name: Desthiny Torrecampo Dumagan

Phone: 0919 291 0069

Email: dumagandesthiny@gmail.com

Education

College

Ateneo de Davao – School Year 2024 – Current Year

Senior High School

Pantukan National High School — School Year 2023–2024

Projects (Include links and add professional descriptions)

1. Calculator
<https://dtdeep.github.io/odin-calculator/>
2. Etch-a-Sketch
<https://dtdeep.github.io/Etch-a-Sketch/>
3. Rock Paper Scissors
<https://dtdeep.github.io/rock-paper-scissors/>

Programming Languages & Technologies

1. JavaScript (Vanilla)
2. ReactJS
3. HTML
4. CSS
5. Tailwind CSS
6. Java
7. C#

Important formatting requirements:

- The resume must strictly fit on one A4 page in Google Docs using normal margins.
- The output must be plain, clean text (no tables, no columns, no special formatting) so it is very easy to copy and paste directly into Google Docs.
- Keep the layout simple, readable, and professional.

Section 2 - LLM Outputs

Output from *Claude Sonnet 4.6* and *Gemini 3* respectively

PROFESSIONAL SUMMARY

Motivated and detail-oriented junior web developer currently pursuing a BS degree at Ateneo de Davao University. Passionate about building clean, functional, and user-friendly web applications using modern front-end technologies. Experienced in JavaScript, HTML, CSS, and ReactJS, with hands-on project experience through self-driven development work. Eager to contribute to a dynamic development team and grow as a professional web developer.

EDUCATION

Bachelor of Science — Ateneo de Davao University Davao City, Philippines | 2024 – Present

Senior High School — Pantukan National High School 2023 – 2024

TECHNICAL SKILLS

Languages & Markup: JavaScript (Vanilla), HTML5, CSS3, Java, C# Frameworks & Libraries: ReactJS, Tailwind CSS Tools & Platforms: GitHub, GitHub Pages, VS Code

WEB DEVELOPMENT PROJECTS

Calculator | <https://dtdeep.github.io/odin-calculator/> Built a fully functional browser-based calculator using Vanilla JavaScript, HTML, and CSS. Implemented core arithmetic operations, chained calculations, and input validation with a clean, responsive UI.

Etch-a-Sketch | <https://dtdeep.github.io/Etch-a-Sketch/> Developed an interactive, grid-based drawing application using JavaScript DOM manipulation. Features dynamic grid resizing and real-time hover-based drawing, demonstrating strong command of event handling and CSS styling.

Rock Paper Scissors | <https://dtdeep.github.io/rock-paper-scissors/> Created a browser-based Rock Paper Scissors game with a JavaScript game logic engine, randomized computer opponent, score tracking, and a responsive, user-friendly interface.

ADDITIONAL INFORMATION

- All projects are deployed live via GitHub Pages and available for review.
- Actively learning full-stack web development and expanding knowledge of ReactJS and modern front-end tooling.

DESTHINY TORRECAMPO DUMAGAN

Davao City, Philippines | 0919 291 0069 dumagandesthiny@gmail.com | github.com/dtdeep

SUMMARY Junior Web Developer focused on building responsive, user-centric front-end applications. Proficient in JavaScript and ReactJS with a strong foundation in modern CSS frameworks and software development principles.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3, Java, C#
- **Technologies:** ReactJS, Tailwind CSS, Git, GitHub
- **Development:** Responsive Design, DOM Manipulation, SDLC, UI/UX Wireframing

WEB DEVELOPMENT PROJECTS

Interactive Calculator | dtdeep.github.io/odin-calculator/

- Engineered a web-based calculator using Vanilla JavaScript, HTML, and CSS.
- Implemented logic for complex operations, decimal handling, and error-catching for edge cases.
- Optimized the UI for clean hierarchy and intuitive user interaction.

Etch-a-Sketch | dtdeep.github.io/Etch-a-Sketch/

- Built a dynamic sketching application using advanced DOM manipulation and event listeners.
- Integrated a customizable grid system with real-time resolution adjustments.
- Styled using CSS Grid and Flexbox for a fully responsive, modern layout.

Rock Paper Scissors | dtdeep.github.io/rock-paper-scissors/

- Developed a browser-based game featuring automated scoring and state management.
- Utilized conditional logic to handle win/loss conditions and real-time UI updates.
- Focused on writing clean, modular code to improve performance and maintainability.

EDUCATION

Ateneo de Davao University | Davao City

- Bachelor of Science in Information Technology (In Progress) | 2024 – Present
- Focus: Technical mathematical studies, Database Management (SQL), and SDLC.

Pantukan National High School | Pantukan

- Senior High School Diploma | Graduated 2024.

Section 3 – Comparison Table

Criteria	Claude Sonnet 4.6	Gemini 3
Structure	Good sections but more crowded	Clear sections, balanced layout
Clarity	Good wording but slightly dense	Easy to read, smooth wording
Formatting	Clean spacing, professional look	More bullets, feels busy
Overall Quality	Good – but needs small cleanup	Better – polished and ready to use

Section 4 – Reflection

Between the two LLMs, I personally think Gemini performed better. Its output was more detailed and professional, its well-written sections felt ready to use. Claude also produced a decent resume, but it felt too simple and plain, like it still needed more content. The two models clearly had different approaches — Gemini focused on depth and detail, while Claude focused more on spacing and layout. Because of this, Gemini's version required less editing and served as a stronger starting point. For my final resume, I used Gemini's output as the base and only borrowed some of Claude's cleaner spacing to make it easier to read. From there, I improved the resume by adding more necessary content, editing the layout (like adding my picture), and made sure everything fit neatly on one page. This activity taught me a few important lessons. First, the clearer and more specific the prompt, the better the output. Second, AI outputs are not perfect and still need human editing. Overall, this process helped me understand how to use AI as a practical tool to improve my work instead of simply relying on it to do everything for me.

Section 5 - Final Resume

NOTABLE EXPERIENCES

- Active member of Samahan Systems Development of Ateneo de Davao (since January 2026), collaborating with peers on software and web development initiatives.
- Developed multiple personal software and web projects throughout four years of college, strengthening practical skills in problem-solving, debugging, and full-stack development.
- Continuously self-studying modern development tools, frameworks, and best practices to improve code quality and stay current with industry trends.
