

Initial Prompt

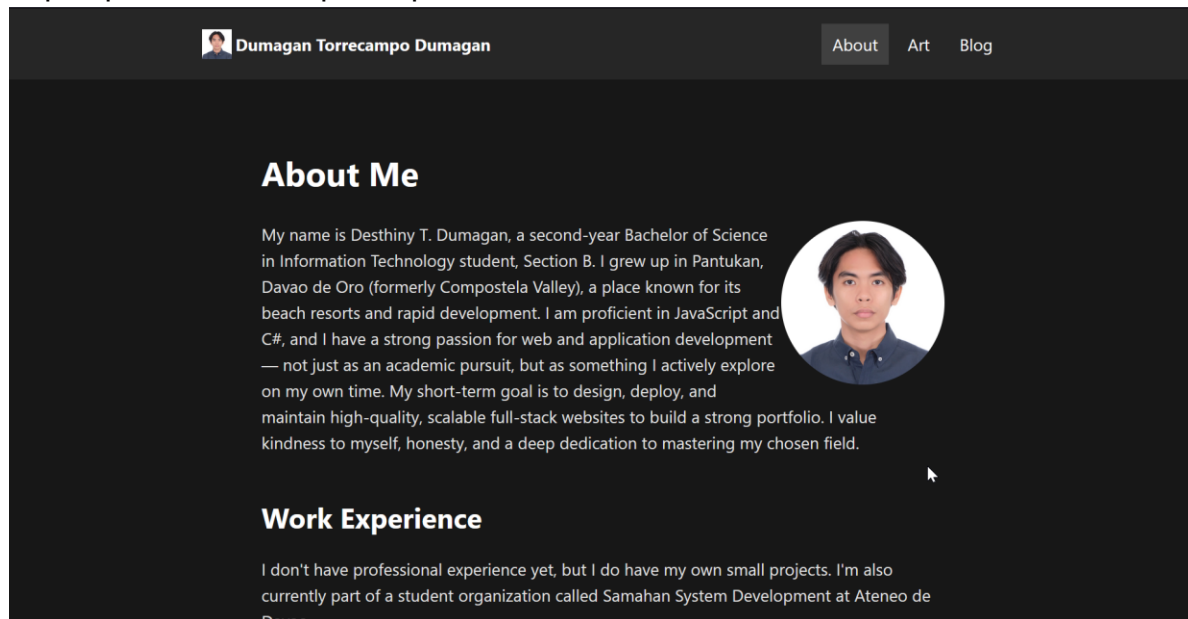

Act as a professional front-end Web Developer. Using the provided PDF, I want you to create me a one page portfolio about myself. There should be a navigation bar at the very top of the website (those don't have to work) and a very simple footer part at the very bottom. There should be a software projects sections, where I can list my projects for now generate the initial design.

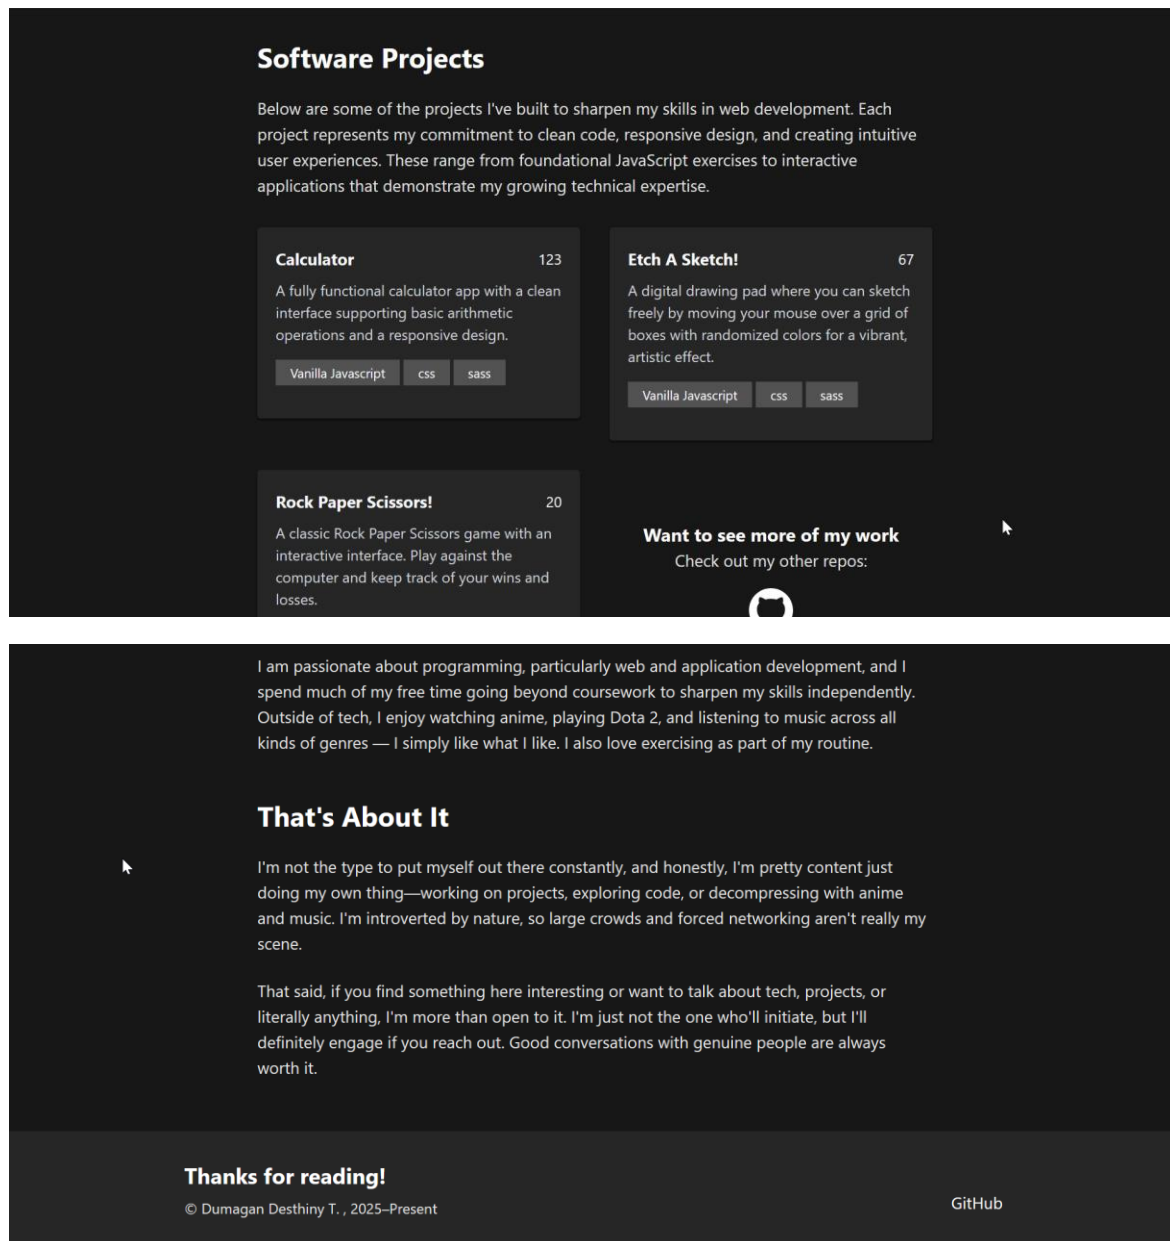

Refinement Prompt

1. The personal Project sections should be kind of like a card component with name, description and the languages used in the projects. These are my projects for reference add them all 1. Calculator 2. Etch a Sketch 3. Rock Paper and Scissors!. These are the links respectively: 1. <https://dtdeep.github.io/odin-calculator/> 2. <https://dtdeep.github.io/Etch-a-Sketch/> 3. <https://dtdeep.github.io/rock-paper-scissors/>. Clicking the box should go to that links
2. Make the overall design of the website in dark mode, the navigation bar should include my name and picture. Use the picture that I have provided

Screenshot and Website Link

Final Reflection

1. The AI made a good starting layout fast. The dark mode design, navbar, footer, and project cards were already structured. The project links and card idea were implemented correctly, so I had a solid base to deploy on Replit.
2. I had to adjust spacing, font sizes, and alignment. The picture placement in the navbar needed tweaking. Some text and colors also needed small changes to look cleaner and more personal.
3. I learned that clear and detailed prompts give better results. When I added specific instructions (dark mode, card layout, links), the output improved a lot. Good prompting saves time but still needs small manual edits.
